

## TRAFFIC FIGURES DECEMBER 2003

- Total passenger traffic (RPK) increased 123 % compared to the same period last year.
- The total number of passengers transported in December 2003 were 131 000, compared to 75 000 in the same period in 2002.
- Passenger load factor increased 15 p.u from 56 % in 2002 to 71 % in 2003.
- In December internet sales on [www.norwegian.no](http://www.norwegian.no) were 52 % of all tickets sold compared to 19 % in December 2002.

The increase in RPK, ASK and number of passengers compared to December 2002 is due to expansion of 13 new routs in the period of April to September 2003, adjustments of production capacity and increase in number of passengers carried on established routes.

The overall yield for the period is expected to be at a lower level compared to December 2002. This is due to expansion and new routes with relatively longer distances and rebated ticket prices in the start up phase. The company has during the year also decreased its ticket prices.

The continuing high number of tickets sold on [www.norwegian.no](http://www.norwegian.no) confirms that passengers prefer to buy their tickets through this channel.
